

WHO SHOULD BE PART OF THE NETWORK?

- Fire & Rescue Services - Civil Protection Agencies
- Academic Institutions - Industry Partners - Policy-Makers - International Organizations - Local Communities - Non-Governmental Organizations (NGOs) - Standardization Bodies - Research Organizations

KEY RESULTS

- Procedures and tools for gap analysis and solution assessment.
- Procedures for project outcome evaluation.
- Tools for linking innovation to responder needs.
- Method for research priority recommendations.
- A sustainable CMINE-based platform.
- Enhanced practitioner involvement in disaster resilience.
- Collaboration with CTIF, FEU and responder organisations to enhance innovation development and uptake.

CONSORTIUM PARTNERS

WOITSCH CONSULTING

Coordinator

Olivier Salvi (INERIS DEVELOPPEMENT)

Project manager

Bastien Caillard (INERIS DEVELOPPEMENT)

@DIREKTIONnet

Funded by the European Union

Disaster Resilience Knowledge Network

www.direktion-network.org

Promoting innovation, technology uptake and multi-stakeholder cooperation, fostering the dialogue and common understanding amongst disciplines and stakeholders

Manage the Network of networks

A balanced consortium with capacity of managing the network of networks in the field of DRS (Disaster Resilient Societies)

Ensure sustainability

The sustainability of the implementation of procedures and mechanisms established in the project to strengthen security research and innovation in the field of DRS

Support the market uptake

The capacity to support the market uptake thanks to the identification of opportunities and the mitigation or removal of the constraints/ barriers

Program EU-funded security research

The capacity to organize and carry out the programming of EU-funded security research and capacity building funds through a periodic and timely evidence-based policy feedback

Support technology development

The capacity to support technology development based on the enhanced cooperation between research institutions, smaller private research agencies, security responders, SMEs and community responders

OUR VISION

- **Collaboration:** We encourage collaboration among practitioners, academics, industry, and policymakers.
- **Innovation Focus:** We develop tailored, innovative, and cost-effective solutions for operational needs.
- **Early Needs:** We identify practitioner needs early, fostering proactive solution development.
- **Co-development:** Solutions are co-developed with industry and research partners.
- **Knowledge Exchange:** We connect with CERIS for knowledge exchange and best practices.
- **European Tech:** We promote European-made technology.
- **Market Integration:** We help integrate innovative solutions into the European security market.

OUR MISSION

- **Knowledge Network:** DIREKTION is a knowledge network for disaster resilience, fostering innovation, cooperation, and dialogue.
- **Interdisciplinary:** We bridge disciplines and stakeholders, promoting common understanding.
- **Effective Interaction:** We provide organization, procedures, and mechanisms for effective stakeholder interaction and knowledge exchange.

Disaster Resilience Knowledge Network promoting innovation, technology uptake and multi-stakeholder cooperation
